OKLAHOMA CITY 2, OKLAHOMA

October 16, 1957

Pan American Petroleum Corporation
Post Office Box 999
Roswell, New Mexico

Attention: Mr. C. L. Kelley

Gentlemen:

Re: Abandonment of Langlie "A" No. 2, Langlie Unitized
Repressuring Project, Lea County, New Mexico. Our
File No. G-106.

Reference is made to my letter of December 5, 1956 relative to the Langlie Repressuring Project and in particular to Pan American's request for the return of Langlie "A" No. 2.

You will recall in connection with this matter that a letter ballot was furnished to all the unit lessees with the request that they approve or disapprove our Company's recommendation that the working interest owners authorize the abandonment of the Langlie "A" No. 2 in the Langlie horizon and the return of this well to the original owner as provided in the Unitization Agreement and Operating Agreement.

This is to advise you that abandonment of the Langlie "A" No. 2 has been approved by the required working interest ownership, i.e., at least three (3) lessees having a combined participation of at least 50 percent. Pan American Petroleum Corporation, therefore, is now authorized to take over the Langlie "A" No. 2 well for recompletion in a horizon other than the Langlie horizon.

In accordance with the content of my letter of December 5, 1956 please advise what portion, if any, of the Unit owned equipment and materials on the Langlie "A" No. 2 well will be needed by your company in its future operations. As you know, some of the equipment on the well was installed subsequent to the date of
