NOTICE OF INTENTION TO SHOOT OR ACIDIZE		SUBSEQUENT REPORT OF ABANDONMENT	
NOTICE OF INTENTION TO PULL OR ALTER CASING		SUPPLEMENTARY WELL HISTORY	
NOTICE OF INTENTION TO ABANDON WELL			

(INDICATE ABOVE BY CHECK MARK NATURE OF REPORT, NOTICE, OR OTHER DATA)

October 21, 1963

Well No. 1 is located 2310 ft. from N line and 2310 ft. from E line of sec. 11
SW NE Sec. 11 25-S 37-E (Range) (Meridian)
(1/4 Sec. and Sec. No.) (Twp.)
Justis Lea New Mexico
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is 3130 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

It is proposed to re-enter a plugged well, clean out to total depth 3480', and drill to 6300' (Tubb Drinkard). If productive, well will be dually completed in Blinberry and Tubb Drinkard.
When this well was originally drilled in May 1961, a 5/8" 24# J-55 casing was set and cemented to the surface. This casing was new. A 7 7/8" hole will be drilled to 6300' and if productive, new 5 1/2" casing of weights and grades for maximum protection will be set at total depth and cemented to the surface.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
