Well No. **1** is located **2310** ft. from **[N]** line and **2310** ft. from **[E]** line of sec. **11**

SW NE of 11 (1/4 Sec. and Sec. No.) **258** (Twp.) **37E** (Range) (Meridian)
Langlie-Mattix (Field) **Lee** (County or Subdivision) **New Mexico** (State or Territory)

The elevation of the derrick floor above sea level is _____ ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

It is proposed to drill with rotary tools to the Seven Rivers Queen formation at about 3500'. Set 8 5/8" at 300' with cement circulated. If productive, set 5 1/2" csg. to Total Depth and cement with about 250 sacks, which gives a calculated fillup of 1691'.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
