| | | | Arrort casing pressure in lieu of tubing pressure for any well producing through casing. Mail original and ane copy of this report to the district office of the New Memico Ol Rule 301 and appropriate pool rules. | During gas-oil ratio test, each well shall be produced at a rate not exceeding the top unit allowable for the pool in which well is located by more than 15 percent. Operator is encouraged to take advantage of this 25 percent tolerance in order that well can be assigned. Increased allowables when authorized by the Commission. Gas volumes must be reported in MCF measured at a pressure base of 15.025 psia and a temperature of 60° F. Specific gravity base will be 0.00. | No well will be assigned an allowable greater than the amount of oil produced on the produced | | • | ••• | | | | | | • | | 5 | RIO | | | | Address 1300 Wilco Bldg.
