

REQUEST FOR (OIL) - (GAS) ALLOWABLE

New Well
Recompletion

This form shall be submitted by the operator before an initial allowable will be assigned to any completed Oil or Gas well. Form C-104 is to be submitted in QUADRUPLICATE to the same District Office to which Form C-101 was sent. The allowable will be assigned effective 7:00 A.M. on date of completion or recompletion, provided this form is filed during calendar month of completion or recompletion. The completion date shall be that date in the case of an oil well when new oil is delivered into the stock tanks. Gas must be reported on 15.025 psia at 60° Fahrenheit.

1. The first part of the document discusses the importance of maintaining accurate records of all transactions and activities. It emphasizes that proper record-keeping is essential for transparency and accountability, particularly in financial matters. The text suggests that organizations should implement robust systems to track every aspect of their operations, from procurement to sales, to ensure that all data is captured and stored securely.

2. The second part of the document addresses the challenges of data management in a rapidly changing environment. It highlights the need for flexible and scalable solutions that can adapt to new requirements and technologies. The author argues that organizations must invest in training and development to ensure that their staff are equipped with the skills necessary to manage complex data sets effectively. Additionally, the text stresses the importance of regular audits and reviews to identify and address any potential issues or vulnerabilities in the data management process.

3. The third part of the document focuses on the role of technology in enhancing data management practices. It explores various tools and platforms that can be used to streamline data collection, storage, and analysis. The author notes that while technology offers significant advantages, it also presents new challenges, such as data security and privacy concerns. Therefore, organizations must carefully evaluate the risks and benefits of adopting new technologies and implement appropriate safeguards to protect their data.

4. The fourth part of the document discusses the importance of collaboration and communication in data management. It argues that data is often siloed within different departments, which can lead to inefficiencies and inconsistencies. To overcome this, the author recommends establishing clear lines of communication and fostering a culture of shared information. Regular meetings and reports should be used to keep all stakeholders informed of the current status of data management and to coordinate efforts to improve the overall system.

5. The fifth part of the document provides a summary of the key points discussed and offers some final thoughts on the future of data management. The author concludes that while the challenges are significant, the benefits of effective data management are immense. By following the principles outlined in the document, organizations can ensure that they are well-prepared to handle the data demands of the future.
