(Meridian)

Justin (Elmestery & Tubbs  
or Elmestery & Brinkard)  
(Well)

Lea  
(County or Subdivision)

New Mexico  
(State or Territory)

The elevation of the derrick floor above sea level is 3160 ft.

## DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

We propose to drill this well to a TD of 6000', set 9-5/8" OD 36' casing at approximately 530' and circulate cement to surface. We propose to set 7" casing at TD and cement with a calculated volume of cement that will bring cement to surface casing. Final completion will be made in the Elmestery and Tubbs or Elmestery and Brinkard zones thru 2 parallel strings of tubing.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
