June 10, 1963

Well No. **3** is located **660** ft. from **S** line and **660** ft. from **W** line of sec. **14****SW/4 SW/4 Sec. 14**
(1/4 Sec. and Sec. No.)**T-25-S, R-37-E**
(Twp.) (Range)**NMPM**
(Meridian)**Langlie Mattix**
(Field)**Lea**
(County or Subdivision)**New Mexico**
(State or Territory)The elevation of the derrick floor above sea level is **3095** ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

In March, 1963, this well failed to produce measurable quantities of gas and was shut-in. Well has now been re-classified as "temporarily Abandoned". Well temporarily abandoned by closing wellhead valves. Well to remain in this status pending possible future use in secondary recovery operations or is an injection well.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
