

NEW MEXICO OIL CONSERVATION COMMISSION

Santa Fe, New Mexico

MISCELLANEOUS REPORTS ON WELLS

Submit this report in triplicate to the Oil Conservation Commission or its proper agent within ten days after the work specified is completed. It should be signed and sworn to before a notary public for reports on beginning drilling operations, results of shooting well, results of test of casing shut-off, result of plugging of well, and other important operations, even though the work was witnessed by an agent of the Commission. Reports on minor operations need not be signed and sworn to before a notary public. See additional instructions in the Rules and Regulations of the Commission.

Indicate nature of report by checking below:

The first of these is the fact that the human body is not a simple machine, but a complex organism, capable of adapting itself to its environment. This is the basis of the second point, which is that the human body is not a static entity, but a dynamic one, constantly changing and evolving.

The third point is that the human body is not a single entity, but a collection of many different parts, each of which has its own function and purpose. This is the basis of the fourth point, which is that the human body is not a simple machine, but a complex organism, capable of adapting itself to its environment.

The fifth point is that the human body is not a static entity, but a dynamic one, constantly changing and evolving. This is the basis of the sixth point, which is that the human body is not a single entity, but a collection of many different parts, each of which has its own function and purpose.

The seventh point is that the human body is not a simple machine, but a complex organism, capable of adapting itself to its environment. This is the basis of the eighth point, which is that the human body is not a static entity, but a dynamic one, constantly changing and evolving.

The ninth point is that the human body is not a single entity, but a collection of many different parts, each of which has its own function and purpose. This is the basis of the tenth point, which is that the human body is not a static entity, but a dynamic one, constantly changing and evolving.

The eleventh point is that the human body is not a simple machine, but a complex organism, capable of adapting itself to its environment. This is the basis of the twelfth point, which is that the human body is not a static entity, but a dynamic one, constantly changing and evolving.

The thirteenth point is that the human body is not a single entity, but a collection of many different parts, each of which has its own function and purpose. This is the basis of the fourteenth point, which is that the human body is not a static entity, but a dynamic one, constantly changing and evolving.

The fifteenth point is that the human body is not a simple machine, but a complex organism, capable of adapting itself to its environment. This is the basis of the sixteenth point, which is that the human body is not a static entity, but a dynamic one, constantly changing and evolving.

The seventeenth point is that the human body is not a single entity, but a collection of many different parts, each of which has its own function and purpose. This is the basis of the eighteenth point, which is that the human body is not a static entity, but a dynamic one, constantly changing and evolving.

The nineteenth point is that the human body is not a simple machine, but a complex organism, capable of adapting itself to its environment. This is the basis of the twentieth point, which is that the human body is not a static entity, but a dynamic one, constantly changing and evolving.

The twenty-first point is that the human body is not a single entity, but a collection of many different parts, each of which has its own function and purpose. This is the basis of the twenty-second point, which is that the human body is not a static entity, but a dynamic one, constantly changing and evolving.

The twenty-third point is that the human body is not a simple machine, but a complex organism, capable of adapting itself to its environment. This is the basis of the twenty-fourth point, which is that the human body is not a static entity, but a dynamic one, constantly changing and evolving.

The twenty-fifth point is that the human body is not a single entity, but a collection of many different parts, each of which has its own function and purpose. This is the basis of the twenty-sixth point, which is that the human body is not a static entity, but a dynamic one, constantly changing and evolving.

The twenty-seventh point is that the human body is not a simple machine, but a complex organism, capable of adapting itself to its environment. This is the basis of the twenty-eighth point, which is that the human body is not a static entity, but a dynamic one, constantly changing and evolving.

The twenty-ninth point is that the human body is not a single entity, but a collection of many different parts, each of which has its own function and purpose. This is the basis of the thirtieth point, which is that the human body is not a static entity, but a dynamic one, constantly changing and evolving.

The thirty-first point is that the human body is not a simple machine, but a complex organism, capable of adapting itself to its environment. This is the basis of the thirty-second point, which is that the human body is not a static entity, but a dynamic one, constantly changing and evolving.

The thirty-third point is that the human body is not a single entity, but a collection of many different parts, each of which has its own function and purpose. This is the basis of the thirty-fourth point, which is that the human body is not a static entity, but a dynamic one, constantly changing and evolving.
