17. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work) SEE RULE 1103.

The following work was performed in conjunction with the Casing Leak Survey conducted by the New Mexico Oil Conservation Commission on February 11 and 12, 1974:

1. Cellar was dug out to expose the outlets of bradenheads from the first string of pipe cemented in the well and all subsequent heads to and including the tubing head.
2. One opening from all bradenheads was connected to a second valve above the surface. Valves above the surface are identified for future reference.

The purpose of filing this Form C-103 is to avoid the necessity of digging out down to the bradenheads for future Casing Leak Surveys.

18. I hereby certify that the information above is true and complete to the best of my knowledge and belief.
