Re: Request for Non-Standard  
Proration Unit  
E. C. Winters Lease  
NE/4 Section 18,  
T-25-S, R-37-E  
Lea County, New Mexico

Gentlemen:

In September, 1980, Doyle Hartman drilled and completed the E. C. Winters No. 2 in the Jalmat Pool. Attached is a copy of the Approval for a Non-Standard Proration Unit dated July 29, 1980. The well was originally intended to be drilled as an infill gas well but early producing characteristics had the well classified as an oil well. At that time the proration unit for the E. C. Winters No. 1 was reduced from 160 acres to 120 acres with 40 acres dedicated to the E. C. Winters No. 2. Recent production tests now indicate that the E. C. Winters No. 2 is producing as a gas well and should be reclassified as one. At this time we would like to have the 160 acre proration unit reinstated for the E. C. Winters No. 1 and we request administrative approval to simultaneously dedicate the E. C. Winters No. 2 as a second well on the subject proration unit.

Three copies of a land plat showing the location of the original Jalmat (Gas) well on the 160-acre proration unit plus the location of the E. C. Winters No. 2 well are also enclosed.

Copies of this application have been sent by certified mail to the offsetting parties operating Jalmat (Gas) rights. The following is a list of the offsetting Jalmat (Gas) operators:

Texaco, Inc.
