Attention Mr. J. T. Sexton
            Supervisor and O&G Inspector

Temporary Approval to Connect and Test Continental Oil Company's, Sholes
B-19 No. 2, located in Section 19, T-25N, R-37E, Lea County, New Mexico

Dear Sir:

Continental Oil Company respectfully requests approval for a temporary
pipeline connection in order to test and restore production to the
subject Sholes B-19 No. 2, located 990' FNL & 2310' FWL of Section 19,
T-25S, R-37E, Lea County, New Mexico.

This well was originally completed as a gas well in the Jalmat Yates Gas
formation in 1948. It was reclassified to oil in 1958 and returned to a
gas well classification in 1961. Producing operations were discontinued
soon after, due to fluid build-up within the well bore. The acreage
dedicated to this well was subsequently reassigned to Sholes B-19 No. 1.

Well No. 2 is currently shut-in with a high fluid level. It is intended
to install artificial lift equipment to lower the fluid level and to
evaluate the producibility of this well. It is our preference to make a
temporary connection and sell the gas produced rather than flare it.

Your consideration and approval will be appreciated.

Yours very truly,

L. P. Thompson
Division Manager
