Continental Oil Company
Box 68
Eunice, New Mexico

Gentlemen:

Your Sholes B Well No. 2 located in Unit B of Section 19, T-25-S, R-37-E, Jalmat Pool, has been producing with a gas-oil ratio in excess of 100,000 for at least the last two years. During 1959 the producing gas-oil ratio was 224,802 cubic feet per barrel, and during the first eleven months of 1960 this ratio has increased to 289,854. In view of this, the well is reclassified as a gas well producing from the Jalmat Pool and is to be shut in effective February 1, 1961.

Should you desire to produce this well at some future date, it will be necessary that you obtain an allowable as per Order No. R-1670.

Yours very truly,

OIL CONSERVATION COMMISSION

Joe D. Ramey

THE INTERNATIONAL UNION OF PURE AND APPLIED CHEMISTRY
ON THE WAY TO A NEW WORLD

The International Union of Pure and Applied Chemistry (IUPAC) is a non-governmental organization that promotes the development of chemistry as a science and as a profession. It is the only international organization that represents the entire chemical community, including chemists, physicists, biologists, and engineers. IUPAC is the only international organization that is recognized by the United Nations and the International Olympic Committee. It is the only international organization that is recognized by the International Union of Pure and Applied Physics (IUPAP) and the International Union of Pure and Applied Biology (IUBA). IUPAC is the only international organization that is recognized by the International Union of Pure and Applied Mathematics (IUPM) and the International Union of Pure and Applied Medicine (IUPM). IUPAC is the only international organization that is recognized by the International Union of Pure and Applied Earth Sciences (IUPES) and the International Union of Pure and Applied Environmental Sciences (IUPES).
