Re: Gutman 18 #1-0 Sec. 18-25-37

Gentlemen:

A check of the file on your Gutman 18 #1 well shows that this well has been carried in all our records as a Langlie-Mattix oil well. Since you have filed Form C-103 indicating that you have perforated another zone and this well will be a Jalmat gas well, it will be necessary for you to file the following forms:

- Form C-104(Request for Allowable)-This form should be filled out as completely as possible, giving plug back depth, perforations, date of recompletion etc.
- Form C-110(Certificate of Compliance for Authorization to Transport Gas)
- Form C-128(Gas Well Plat)-This form should be filed in duplicate, with the acreage to be dedicated to the well clearly outlined.

Since the acreage which you intend to dedicate to this well is less than 640 acres, it will be necessary for you to make application to the Oil Conservation Commission in Santa Fe for a non-standard gas proration unit on this well. We are enclosing a memorandum giving instructions in the filing of such applications.

We suggest that you file the required forms with this office as soon as possible, so that there will be no delay in the assigning of the gas allowable to this well when your NSP Order is issued and notice of connection is filed by the transporter.

Yours very truly,

OIL CONSERVATION COMMISSION
