Oil & Gas Inspector

THEORY OF THE EARTH

The theory of the earth is a branch of geology which deals with the origin and development of the earth and its various parts. It is a science which seeks to explain the processes which have shaped the earth and its features. The theory of the earth is based on the study of the earth's history and the changes which have taken place over time. It is a science which is constantly developing as new discoveries are made and new theories are proposed.
