

E¹-PASO NATURAL GAS COMPANY

Memorandum

To John A. Disch

From: J. B. Murray

Date: January 15, 1970

Place: Production Department, Southwest Region, Jal, New Mexico.

Re: Burleson & Huff Lanehart No. 1,
located in M 21-25-37, Lea
County, New Mexico.

An attempt was made to test the above captioned well on January 14, 1970, but was terminated due to lack of pressure.

Listed below is the field data obtained from this test:

Shut-in Pressure: 448 (Psig.) at 8:45 A.M.

	<u>TIME</u>	<u>TBG.</u> <u>PRESS.</u> (Psig.)	<u>WELLHEAD</u> <u>TEMP.</u>	<u>PROVER</u> <u>PRESS.</u> (Psig.)	<u>PROVER</u> <u>TEMP.</u>	<u>ORFICE</u>	<u>VOLUME</u> (Mcf/d)
First Rate:	9:00	413	45°	413	45°	1/16	
	9:15	375	48°	375	48°	1/16	
	9:30	376	51°	376	51°	1/16	
	9:45	372	51°	372	51°	1/16	24.67
Second Rate:	10:00	313	55°	313	55°	3/32	
	10:15	235	58°	235	58°	3/32	
	10:30	177	59°	177	59°	3/32	
	10:45	134	58°	134	58°	3/32	20.75
Third Rate:	11:00	61	59°	61	59°	1/8	
	11:15	37	62°	37	62°	1/8	
	11:30	32	62°	32	62°	1/8	
	11:45	26	63°	26	63°	1/8	19.65

Also, a sample was taken of the gas on the third rate of flow, results of which will be distributed by the Permian Division Laboratory.
