Move in Well Servicing Machine, pull tubing and Packer, give lower pay section shot of 150 to 200 qts. S.N.G. from 3372' to 3400' T.D. Casing 7" OD set and cemented at 2,849'. This well makes no water, but production has declined to a daily average of approximately 6 to 7 barrels per day and gas/oil ratio is high. It is expected that this rework job will materially increase recovery and reduce gas production, although there is market for all gas produced.
