# THEORY OF THE EARTH

CHAPTER I. OF THE ORIGIN OF THE EARTH.

THE first question which presents itself to the mind is, what was the origin of the earth? and the answer to this question is, that it was created by the power of God, out of nothing, at the beginning of time.

THE second question is, what was the state of the earth at first?

At first the earth was a mass of fire, and the elements were in a state of confusion.

Afterwards the elements separated, and the earth became a solid globe.

The next question is, what was the state of the earth when it became a solid globe?

At that time the earth was covered with a thick layer of fire, and the elements were in a state of confusion.

Afterwards the elements separated, and the earth became a solid globe.

THE third question is, what was the state of the earth when it became a solid globe?

At that time the earth was covered with a thick layer of fire, and the elements were in a state of confusion.

Afterwards the elements separated, and the earth became a solid globe.

The next question is, what was the state of the earth when it became a solid globe?

At that time the earth was covered with a thick layer of fire, and the elements were in a state of confusion.

THE fourth question is, what was the state of the earth when it became a solid globe?

At that time the earth was covered with a thick layer of fire, and the elements were in a state of confusion.

Afterwards the elements separated, and the earth became a solid globe.

The next question is, what was the state of the earth when it became a solid globe?

At that time the earth was covered with a thick layer of fire, and the elements were in a state of confusion.

Afterwards the elements separated, and the earth became a solid globe.

THE fifth question is, what was the state of the earth when it became a solid globe?

At that time the earth was covered with a thick layer of fire, and the elements were in a state of confusion.

Afterwards the elements separated, and the earth became a solid globe.

The next question is, what was the state of the earth when it became a solid globe?

At that time the earth was covered with a thick layer of fire, and the elements were in a state of confusion.

Afterwards the elements separated, and the earth became a solid globe.
