FULL DETAILS OF PROPOSED PLAN OF WORK

FOLLOW INSTRUCTIONS IN THE RULES AND REGULATIONS OF THE COMMISSION

In order to reduce development costs on lease it is proposed to produce above two wells through a common separator. Block valves are to be installed between each of three tanks in the battery with flow manifold designed to permit one well to produce through separator into stock tanks while the other flows directly into another stock tank through a line that by-passes the separator. This arrange is to be provided to measure production from each well separately at frequent intervals to adjust flow from each to the daily allowable.
