Completion or Recompletion Report and Log form.)

17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.) *

Subject well was shut-in 7/4/77 with a suspect tubing leak. The well was capable of commercial production prior to the tubing leak. The well was shut-in because its water production accounted for the majority of lease expense.

The last test on 5/3/77 was 2.2 BOPD and 19.9 BWPB.

The well is still shut-in pending results of a recent workover on an offset well, Carlson A No. 1.

The estimated date the well may be returned to production is 6/1/78. We are attempting to hook this well up to the Justis SWDS in an effort to reduce lease expenses.

This approval of temporary
abandonment expires 7-3-78
