17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

Well No. 10 is currently a Montoya and Blinbry dual. It is proposed to temporarily abandon the Montoya and recomplete as a Blinbry and Fusselman dual in the following manner:

1. Pull both tubing strings.
2. Perforate Fusselman Zone from 6707 to 6750' with 15 holes.
3. Acidize Fusselman with 1500 gals. 15% NE Acid.
4. Run tubing strings. The Montoya will be T.A. under a Model "D" Packer by setting a blanking plug in a 8" above it. The Fusselman is to be produced under a Loc-Set Packer through a sliding sleeve in the same tubing string. The Blinbry will be produced through a separate tubing string. It is anticipated when the Fusselman Zone depletes low enough it can be downhole commingled with the Montoya. Well No. 10 is located 430' east of Well No. 11 on the same proration. Well No. 11 is also a Fusselman completion. Total production from these two wells will not exceed the allowable set by the NMOC.

18. I hereby certify that the foregoing is true and correct

Instructions

General: This form is designed for submitting proposals to perform certain well operations, and reports of such operations when completed, as indicated, on Federal and Indian lands pursuant to applicable Federal law and regulations, and, if approved or accepted by any State, on all lands in such State, pursuant to applicable State law and regulations. Any necessary special instructions concerning the use of this form and the number of copies to be submitted, particularly with regard to local, area, or regional procedures and practices, either are shown below or will be issued by, or may be obtained from, the local Federal and/or State office.

Item 4: If there are no applicable State requirements, locations on Federal or Indian land should be described in accordance with Federal requirements. Consult local State or Federal office for specific instructions.

Item 17: Proposals to abandon a well and subsequent reports of abandonment should include such special information as is required by local Federal and/or State offices. In addition, such proposals and reports should include reasons for the abandonment; data on any former or present productive zones, or other zones with present significant fluid contents not sealed off by cement or otherwise; depths (top and bottom) and method of placement of cement plugs; mud or other material placed below between and above plugs; amount, size, method of parting of any casing, liner or tubing pulled and the depth to top of any left in the hole; method of closing top of well; and date well site conditioned for final inspection looking to approval of the abandonment.
