Well No. **660** is located **255** ft. from **37E** line and **1980** ft. from **NMPM** line of sec. **24**
NE/4, NE/4, Sec. 24
Justin Allenburger (Field) **Lee** (County or Subdivision) **N. Mex.** (State or Territory)
3053

The elevation of the derrick floor above sea level is ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)
Well is presently completed in the Allenburger zone thru perforations 2115-45; Due to increased water production, we propose to set cast iron bridge plug @ approximately 2100' and dump 10' cement on top. Re-perforate Allenburger zone 2015-38', acidize w/300 gals. mud acid & swab well in.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
