FULL DETAILS OF PROPOSED PLAN OF WORK
(FOLLOW INSTRUCTIONS IN THE RULES AND REGULATIONS)

We drilled an 8 3/4" hole to 2910 feet and ran a caliper survey. From the caliper survey we calculated that 1330 sack cement would circulate the cement. We plan to set the 7" O.D. casing at approximately 2910 and cement with 1500 sack cement. If we fail to circulate cement we will run a temperature survey and be sure the salt section is covered.
