I hereby certify that the information herein contained is true and complet		r me
knowledge. Approved MAY 4 1971 19 Operator AMERADA HES	S UURFUNAL	
Approved MAI + 107. 19 Jo By By		
By Title Ares Superio	atendent	<u> </u>

1. A packer leakage test shall be commenced on each multiply completed well within seven days after actual completion of the well, and annually thereafter as prescribed by the order authorizing the multiple completion days following recompletion and/or chemical or fracture treatment, and when ever remedial work has been done on a well during which the packer or the munication is suspected or when requested by the Commission

2. At least 72 hours prior to the commencement of any packer leakage test the operator shall notify the Commission in writing of the exact time the test is to be commenced. Offset operators shall also be so notified,

3. The packer leakage test shall commence when both zones of the dual completion are sbut-in for pressure stabilization. Both zones shall remain shut-in until the well-head pressure in each has stabilized and for a minimum of two hours thereafter, provided however, that they need not remain shut-in more than 24 hours.

4. For Flow Test No. 1, one zone of the dual completion shall be produced at the normal rate of production while the other zone rearins shutter. Such test shall be continued until the flowing weilhead oressure has become stabilized and for a minimum of two hours thereafter, provided however, that the flow test need not continue for more than 24 hours.

ŝ

5 Following comp. In of Flow Test No. : the well shall again be shutin, in accordance with Paragraph 3 above.

6. Flow Test No. 2 shall be conducted even though to eak was indicated during Flow Test No. 1. Honeadure for Flow Test No. 2 is to be the same as for Flow Test No. 1 except that the previously produced zone shall remain shut-in while the previously shut-in some is produced.

7. All pressures, throughout the entire test, shall be continuously measured and recorded with recording pressure gauges, the accuracy of which sust be checked with a deadweight tester at least twice-code at the beginning and once at the and, of each flow that.

beginning and once at the end, of each flow thet, 8. The results of the above-described tests shall be filed in triplicate within 15 days after completion of the test. Tests shall be filed with the appropriate District Office of the New Wexic: Oil Conservation Comsission on Southeast New Mexico Packer Leakage Test Form Revised 11-158, deadweight pressures which were taken indicated thereon. In lieu of filing the aforesaid charts, the operator sty construct a pressure versus changes which may be reflected by the gauge charts as will as all deadwright pressure readings which were taken. If the ence will as all deadwright pressure readings which were taken. If the ence we is submitted, the original chart must be permanent by filed to the operator's office. Form C-116 shall also accompany the Facker Lealage Test Form when the test period coincides with a gas-oil tatio test period.
