13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zone. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 day following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the final site is ready for final inspection.)

This information requested by Marlan Deaton with the BLM Office in Hobbs, New Mexico

The produced water from this well goes to the free water knock out and through a Halliburton Water Meter prior to going into the two 500 bbls fiberglass water tanks. The battery site is located at the Carlson A #2 well site in UL-I, Section 25, T25S, R37E, Lea County, New Mexico.

The water is then pumped from the water tanks and transported via poly line, to Rice Operating Company's Justis SWD #2 in UL-H, Section 2, T26S, R37E, Lea County, New Mexico.

This well is currently making 53,493 bbls of water a month, as per March 2000 production report.
