(INDICATE ABOVE BY CHECK MARK NATURE OF REPORT, NOTICE, OR OTHER DATA)

Well No. 4 is located 990 ft. from N line and 90 ft. from E line of sec. 25  
SW/4 SW/4 Sec. 25 25 30 S. 1. 1. N.  
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)  
Justis Blinberry & Brinkard Lea New Mexico  
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is 3242 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

We propose to drill this well to a TD of 5910'. 13-3/8" 40# casing will be set at approximately 650' and cement circulated to surface. 12-1/4" hole will be drilled to 3300'. If gas is encountered in Yates and Queen 9-5/8" 35# casing will be set at approximately 3300' and cement will be brought to base of the surface casing. If no gas is encountered hole size will be reduced to 8-3/4" and drilling continued to TD. We propose to core from 5840' to 5910', set 7" casing at 5840', wash core hole to TD and complete Brinkard in open hole. Sufficient cement will be calculated to bring cement around 7" casing back to the surface casing. Final completion will be made in the Blinberry and the Brinkard zones through two (2) parallel strings of tubing.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
