17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)

Propose to commingle the subject well at a common facility with the Carlson Federal No. 2, on the same lease and in the same pool. The crude from this well, which was originally sweet, has been determined sour. Therefore, it is compatible with production from the No. 2 well. Transporters have been notified of the proposed work, which is scheduled to begin on 8/15/86.
