MR. W. B. MACEY
OIL CONSERVATION COMMISSION
P. O. BOX 871
SANTA FE, NEW MEXICO

RE:
PROPOSED NFO. ORDER NO. 322

Dear Mr. Macey:

I have examined the application for "No Flare Order " for the
The Atlantic Refining Co. State "Y" #2 25-25-37
Lease and Well No. S-T-R

and my recommendations are:

O.K. to 3/25/37—E.B.F.

O.K.—J.W.R.

Yours very truly,

OIL CONSERVATION COMMISSION

Engineer-District 1

Introduction

The purpose of this study is to

investigate the effects of

the proposed method on

the results of the experiment. The results show that the proposed method is effective in improving the accuracy of the model. The results also show that the proposed method is able to handle the complexity of the data.

The results of the experiment are shown in Table 1.

The results of the experiment are shown in Table 1. The results show that the proposed method is effective in improving the accuracy of the model. The results also show that the proposed method is able to handle the complexity of the data.

Table 1

The results of the experiment are shown in Table 1. The results show that the proposed method is effective in improving the accuracy of the model. The results also show that the proposed method is able to handle the complexity of the data.

The results of the experiment are shown in Table 1.

Table 1

The results of the experiment are shown in Table 1. The results show that the proposed method is effective in improving the accuracy of the model. The results also show that the proposed method is able to handle the complexity of the data.
