The Atlantic Refining Company is (Operator) State Y Well No. 3 , located in Unit (lease) Letter B , Section 25 , Township 25 S , Range 37 S , NMPM, Lea County, New Mexico. That said packer was set at a subsurface depth of 6750 TE feet, said depth measurement having been furnished by Wireline Resurrent That the purpose of setting this packer was to effect a seal in the annular space between the two strings of pipe where the packer was set so as to prevent the commingling, within the well-bore, of fluids produced from a stratum below the packer with fluids produced from a stratum above the packer. That this packer was properly set and that it did, when set, effectively and absolutely seal off the annular space between the two strings of pipe where it was set in such manner as that it prevented any movement of fluids across the packer.		st duly sworn according to law, upon his
That on release and as such is its authorized agent. That on release was set at a subsurface depth of feet, Said depth measurement having been furnished by Wireline research. That the purpose of setting this packer was to effect a seal in the annular space between the two strings of pipe where the packer. That this packer was properly set and that it did, when set, effectively and absolutely seal off the annular space between the two strings of pipe where it was set in such manner as that it prevented any movement of fluids across the packer. The Atlantic Refining Company		full knowledge of the facts herein below
That on February 14, 19 62, he personally supervised the setting of a Baker Medal A15-D in The Atlantic Refining Company 's (Make and Type of Packer) (Operator) State Y (Operator) State Y (Decay in The Atlantic Refining Company 's (Iease) Letter B , Section 5, Township 25-S , Range 37-E , NMPM, Letter B , Section 5, Township 25-S , Range 37-E , NMPM, Letter B , Section 6, Township 25-S , Range 37-E , NMPM, Letter	That he is employed by The Atlant	ic Refining Company in the capacity
(Make and Type of Packer) State Y (lease) Letter B , Section 25 That said packer was set at a subsurface depth of 67500000 That said packer was set at a subsurface depth of 67500000 That the purpose of setting this packer was to effect a seal in the annular space between the two strings of pipe where the packer was set so as to prevent the commingling, within the well-bore, of fluids produced from a stratum below the packer with fluids produced from a stratum above the packer. That this packer was properly set and that it did, when set, effectively and absolutely seal off the annular space between the two strings of pipe where it was set in such manner as that it prevented any movement of fluids across the packer.	of District Drilling Supervisor and as such	is its authorized agent.
Mell No. 3 , located in Unit (lease) Letter 8 , Section 25 , Township 25 S , Range 37 , NMPM, County, New Mexico. That said packer was set at a subsurface depth of 675000 feet, said depth measurement having been furnished by Wireline measurement That the purpose of setting this packer was to effect a seal in the annular space between the two strings of pipe where the packer was set so as to prevent the commingling, within the well-bore, of fluids produced from a stratum below the packer with fluids produced from a stratum above the packer. That this packer was properly set and that it did, when set, effectively and absolutely seal off the annular space between the two strings of pipe where it was set in such manner as that it prevented any movement of fluids across the packer.	That on return 14, 19 69, he	e personally supervised the setting of
Letter	a Reker Hedel 415-D in in (Make and Type of Packer)	
County, New Mexico. That said packer was set at a subsurface depth of 675000 feet, said depth measurement having been furnished by Wireline resource. That the purpose of setting this packer was to effect a seal in the annular space between the two strings of pipe where the packer was set so as to prevent the commingling, within the well-bore, of fluids produced from a stratum below the packer with fluids produced from a stratum above the packer. That this packer was properly set and that it did, when set, effectively and absolutely seal off the annular space between the two strings of pipe where it was set in such manner as that it prevented any movement of fluids across the packer.	State Y	Well No. 3 , located in Unit
That said packer was set at a subsurface depth of 6750212 feet, said depth measurement having been furnished by Wireline reasurement. That the purpose of setting this packer was to effect a seal in the annular space between the two strings of pipe where the packer was set so as to prevent the commingling, within the well-bore, of fluids produced from a stratum below the packer with fluids produced from a stratum above the packer. That this packer was properly set and that it did, when set, effectively and absolutely seal off the annular space between the two strings of pipe where it was set in such manner as that it prevented any movement of fluids across the packer.		p 25-8 , Range 37-1 , NMPM,
That the purpose of setting this packer was to effect a seal in the annular space between the two strings of pipe where the packer was set so as to prevent the commingling, within the well-bore, of fluids produced from a stratum below the packer with fluids produced from a stratum above the packer. That this packer was properly set and that it did, when set, effectively and absolutely seal off the annular space between the two strings of pipe where it was set in such manner as that it prevented any movement of fluids across the packer.	County, New Mexico.	
That the purpose of setting this packer was to effect a seal in the annular space between the two strings of pipe where the packer was set so as to prevent the commingling, within the well-bore, of fluids produced from a stratum below the packer with fluids produced from a stratum above the packer. That this packer was properly set and that it did, when set, effectively and absolutely seal off the annular space between the two strings of pipe where it was set in such manner as that it prevented any movement of fluids across the packer.	That said packer was set at a sub-	surface depth of 6750818 feet,
annular space between the two strings of pipe where the packer was set so as to prevent the commingling, within the well-bore, of fluids produced from a stratum below the packer with fluids produced from a stratum above the packer. That this packer was properly set and that it did, when set, effectively and absolutely seal off the annular space between the two strings of pipe where it was set in such manner as that it prevented any movement of fluids across the packer.	said depth measurement having been furnished	d by Wireline measurement.
Company) 1. D. Lothes (its Agent)	annular space between the two strings of pipervent the commingling, within the well-bobelow the packer with fluids produced from packer was properly set and that it did, who seal off the annular space between the two	pe where the packer was set so as to re, of fluids produced from a stratum a stratum above the packer. That this en set, effectively and absolutely strings of pipe where it was set in
