OIL CONSERVATION COMMISSION
SANTA FE, NEW MEXICO

Roswell, New Mexico
(Place)

August 3, 1962
(Date)

Gentlemen:

Following is a Notice of Intention to do certain work as described below at the.....

The Atlantic Refining Company State X Well No. 9 in A
(Company or Operator) Lease (Unit)
NE 1/4 NE 1/4 of Sec. 25, T. 25S, R. 37E, NMPM., Justice-Fusselman Pool
(40-acre Subdivision)
Lea County.

FULL DETAILS OF PROPOSED PLAN OF WORK
(FOLLOW INSTRUCTIONS IN THE RULES AND REGULATIONS)

Fusselman zone (LT) perfs 6748-66', 6774-79', 6782-84', 6789-93' were acidized with 4000 gals 7 1/2% MCA in June, 1962. This treatment was unsuccessful. We now propose to kill well, pull dual completion assembly. Mill up Baker 415-D packer at 6137'. Frac above Fusselman perfs down 2 7/8" tubing with 20,000 gals of lease crude and 26,000# of 20/40 sand. We also propose to set a dual packer at 5863'. This would separate upper Tubb/Drk perfs (5813-23' & 5832-40') from lower T/D perfs (5886-92' & 5897-5918'). We would then produce perfs 5886-92' and 5897-5918' through upper tubing string. This is proposed to attempt to lower the GOR in the Tubb/Drinkard zone.

Approved....., 19.....
