(Meridian)

Justis Tubb-Blinebry
(Name)

Lea
(County or Subdivision)

New Mexico
(State or Territory)

The elevation of the derrick floor above sea level is 3054 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudlogging jobs, cementing points, and all other important proposed work)

Recent tests made on this well, indicate that we have communication between our Blinebry and Tubb zones. We plan to drill out our packers and squeeze to shut off the communication outside of the pipe. We plan to reperforate in the Tubbs and Blinebry zones if necessary after squeeze.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
