

NEW MEXICO OIL CONSERVATION COMMISSION

Santa Fe, New Mexico

MISCELLANEOUS REPORTS ON WELLS

Submit this report in triplicate to the Oil Conservation Commission or its proper agent within ten days after the work specified is completed. It should be signed and sworn to before a notary public for reports on beginning drilling operations, results of shooting well, results of test of casing shut-off, result of plugging of well, and other important operations, even though the work was witnessed by an agent of the Commission. Reports on minor operations need not be signed and sworn to before a notary public. See additional instructions in the Rules and Regulations of the Commission.

Indicate nature of report by checking below:

REPORT ON BEGINNING DRILLING OPERATIONS		REPORT ON REPAIRING WELL	
REPORT ON RESULT OF SHOOTING OR CHEMICAL TREATMENT OF WELL		REPORT ON PULLING OR OTHERWISE ALTERING CASING	
REPORT ON RESULT OF TEST OF CASING SHUT-OFF	X	REPORT ON DEEPENING WELL	
REPORT ON RESULT OF PLUGGING OF WELL

RESEARCH REPORT

THE REACTION OF HYDROGEN PEROXIDE WITH
HYDROLYZABLE POLYMERIZATION PRODUCTS
OF VINYL MONOMERS

BY J. H. KIM AND R. W. L. MCKAY

DEPARTMENT OF CHEMISTRY, THE UNIVERSITY OF CHICAGO,
CHICAGO, ILLINOIS 60637

RECEIVED JANUARY 15, 1968

ABSTRACT

The reaction of hydrogen peroxide with the hydrolyzable polymerization products of vinyl monomers was studied. The products were found to be highly reactive towards hydrogen peroxide, and the reaction was found to be first order in both the product and the peroxide.

INTRODUCTION

The reaction of hydrogen peroxide with the hydrolyzable polymerization products of vinyl monomers was studied. The products were found to be highly reactive towards hydrogen peroxide, and the reaction was found to be first order in both the product and the peroxide.
