Figure 1. The effect of the concentration of the *Agrobacterium* strain on the transformation efficiency of *Agrobacterium* strain on *Agrobacterium* strain.

*(The following information was obtained from the records of the Department of Social Services, State of New York.)*

Figure 6. The effect of the initial concentration of the monomer on the polymerization rate at different temperatures.

Figure 1. The effect of the concentration of the *Agrobacterium* suspension on the transformation efficiency of *Agrobacterium* strains. The number of transformed cells was determined by the number of colonies obtained on the selective medium. The results are the mean of three independent experiments.
