 Well No. 1 is located 1980 ft. from NE line and 1980 ft. from W line of sec. 28
SW/4 Sec. 28 (1/4 Sec. and Sec. No.) 28 (Twp.) 17E (Range) N. N. P. M. (Meridian)
Wilcox (Field) Lee (County or Subdivision) New Mexico (State or Territory)

The elevation of the derrick floor above sea level is 3090 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

It is proposed to drill a well on the above described location to a total depth of approximately 11,600' in the Ellenberger pay or to 12,500' if Ellenberger is dry, with the following casing and cement program: Set 13-3/8" OD casing at 350' with sufficient amount of cement to circulate. Set 9-5/8" OD or 8-5/8" OD casing at 3600' with sufficient amount of cement to circulate. Set 5-1/2" OD casing at 11,600' and cement with 500 sacks and perforate and acidize as necessary for production.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
