\*Blank off Lower set of perforations

This well is presently producing from perforations 8555-8640' and 8665-8685'. Due to loading up with water this well will not produce into EPNGC's 50 PSI low pressure line. In an attempt to shut off water from lower perforations 8600-8650' we propose to set a Bridge Plug at approximately 8675'.
