Re: Request for Non-standard Gas Proration Unit
Burleson & Huff Jenkins Lease
SW/4 of Section 29, T-25-S, R-37-E,
Lea County, New Mexico

Gentlemen:

We propose to re-enter the Burleson & Huff Number 3 Jenkins well and attempt completion in the Seven Rivers and Yates formations at depths of about 3000 and 2700 feet respectively. The well is located 1980 feet from the West line and 760 feet from the South line of Section 29. We anticipate that we will obtain gas production in both the Seven Rivers and Yates formations, and both such zones are included in the Jalmat Gas Field and are covered by the field rules thereof. Our lease acreage consists of the above captioned acreage only, and we therefore request that you approve a non-standard gas proration unit for our well in the Jalmat Gas Field consisting of the SW/4 of Section 29.

We are enclosing three copies of a plat showing the location of the well and the proposed 160 acre proration unit which is colored in red. Also shown on the plat are the off-setting operators to our proposed 160 acre unit.

A copy of this letter and the enclosed plat has been sent by certified mail, return receipt requested, to all off-setting operators, to-wit: Bettis, Boyle & Stovall, Texas Pacific Oil Company, Gulf Oil Company and Atlantic Richfield Company. As soon as we have received the return receipts from all of these operators we will forward them to you.

We will appreciate your favorable action on our request.

Yours very truly,

BURLESON & HUFF

Jack Huff
