RE: REQUEST FOR ASSIGNMENT OF  
160 ACRE GAS PRORATION UNIT TO  
R. OLSEN OIL COMPANY'S WINNINGHAM  
#1, JALMAT POOL, LEA COUNTY, NEW  
MEXICO.

New Mexico Oil Conservation Commission  
P. O. Box 871  
Santa Fe, New Mexico

Gentlemen:

Under provisions of the New Mexico Oil Conservation Commission Order No. R-520, the R. Olsen Oil Company desires to dedicate 160 acres to its Winningham # 1, Jalmat Pool, for gas proration purposes. Winningham # 1 is located 660' from North Line and 1980' from West Line of Section 30, T 25S, R 37E. The acreage to be dedicated to the subject well includes the E/2 of NW/4 and W/2 of NE/4 of Section 30, T 25S, R 37E. Winningham #1 was completed as a Yates gas well on July 8, 1949, at a total depth of 2817'. Seven inch casing was set at 2680'. The well is currently being produced on the basis of an 80 acre allowable.

The R. Olsen Oil Company warrants that the non-standard gas proration unit applied for consists of contiguous quarter-quarter sections lying wholly within a single governmental section, and further warrants that the non-standard gas proration unit is productive of gas and that the length and width of the non-standard gas proration unit does not exceed 5280'.

By copy of this letter, all operators within Section 30, T 25S, R 37E and within 1500 feet of subject well are notified of the Company's request for a non-standard gas proration unit.

Yours very truly,

R. OLSEN OIL COMPANY
