SANTA FE, NEW MEXICO

Miscellaneous Reports on Wells

OCT 26 1950
OIL CONSERVATION COMMISSION

Submit this report in triplicate to the Oil Conservation Commission or its proper agent within ten days after the work specified is completed. It should be signed and sworn to before a notary public for reports on beginning drilling operations, results of shooting well, results of test of casing shut off, result of plugging of well, and other important operations, even though the work was witnessed by an agent of the Commission. Reports on minor operations need not be signed and sworn to before a notary public. See additional instructions in the Rules and Regulations of the Commission.

Indicate nature of report by checking below.

REPORT ON BEGINNING DRILLING OPERATIONS		REPORT ON REPAIRING WELL	
REPORT ON RESULT OF SHOOTING OR CHEMICAL TREATMENT OF WELL		REPORT ON PULLING OR OTHERWISE ALTERING CASING	
REPORT ON RESULT OF TEST OF CASING SHUT-OFF		REPORT ON DEEPENING WELL	
REPORT ON RESULT OF PLUGGING OF WELL		Report on shut in pressure of High Pressure Gas Wells	X

October 18, 1950

THEORY OF THE EARTH

1. The Earth is a sphere of about 8000 miles in diameter.

2. The Earth is composed of a solid outer shell, a molten middle layer, and a solid inner core.

3. The outer shell is composed of a crust and a mantle.

4. The crust is the thin outer layer of the Earth, ranging from 5 to 10 miles in thickness.

5. The mantle is the layer between the crust and the core, ranging from 60 to 70 miles in thickness.

6. The core is the innermost layer of the Earth, ranging from 1200 to 1300 miles in radius.

7. The core is composed of a solid inner core and a molten outer core.

8. The outer core is the layer between the inner core and the mantle, ranging from 1200 to 1300 miles in radius.

9. The inner core is the solid innermost layer of the Earth, ranging from 1200 to 1300 miles in radius.

10. The inner core is composed of a solid inner core and a molten outer core.

11. The outer core is the layer between the inner core and the mantle, ranging from 1200 to 1300 miles in radius.

12. The inner core is the solid innermost layer of the Earth, ranging from 1200 to 1300 miles in radius.

13. The outer core is the layer between the inner core and the mantle, ranging from 1200 to 1300 miles in radius.

14. The inner core is the solid innermost layer of the Earth, ranging from 1200 to 1300 miles in radius.

15. The outer core is the layer between the inner core and the mantle, ranging from 1200 to 1300 miles in radius.

16. The inner core is the solid innermost layer of the Earth, ranging from 1200 to 1300 miles in radius.

17. The outer core is the layer between the inner core and the mantle, ranging from 1200 to 1300 miles in radius.

18. The inner core is the solid innermost layer of the Earth, ranging from 1200 to 1300 miles in radius.

19. The outer core is the layer between the inner core and the mantle, ranging from 1200 to 1300 miles in radius.

20. The inner core is the solid innermost layer of the Earth, ranging from 1200 to 1300 miles in radius.

21. The outer core is the layer between the inner core and the mantle, ranging from 1200 to 1300 miles in radius.

22. The inner core is the solid innermost layer of the Earth, ranging from 1200 to 1300 miles in radius.

23. The outer core is the layer between the inner core and the mantle, ranging from 1200 to 1300 miles in radius.

24. The inner core is the solid innermost layer of the Earth, ranging from 1200 to 1300 miles in radius.

25. The outer core is the layer between the inner core and the mantle, ranging from 1200 to 1300 miles in radius.

26. The inner core is the solid innermost layer of the Earth, ranging from 1200 to 1300 miles in radius.
