

Santa Fe, New Mexico

NOTICE OF INTENTION TO DRILL

RECEIVED
SEP 6 - 1951

Notice must be given to the Oil Conservation Commission or its proper agent and approval obtained before drilling begins. If changes in the proposed plan are considered advisable, a copy of this notice showing such changes will be returned to the sender. Submit this notice in triplicate. One copy will be returned following approval. See additional instructions in Rules and Regulations of the Commission.

Jal., New Mexico

Place

August 10, 1951

Date

OIL CONSERVATION COMMISSION,
Santa Fe, New Mexico,

Gentlemen:

You are hereby notified that it is our intention to commence the drilling of a well to be known as

Olsen Blount Oil Co.

Company or Operator

Legal

Lease

Well No. 2 in NE SE

of Sec. 31, T. 25S, R. 37E, N. M., P. M., Langlie-Mattin Field, Lea County.

N

The well is 1980 feet (N.) (S) of the South line and 660 feet (W.) of the East line of Sec. 31

(Give location from section or other legal subdivision lines. Cross out wrong directions.)

If state land the oil and gas lease is No. Assignment No.

If patented land the owner is M. F. Legal

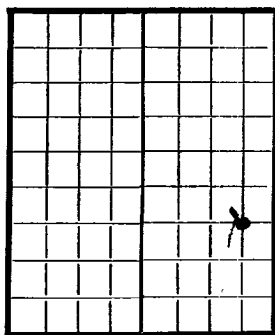

Address

If government land the permittee is

Address

The lessee is Olsen Blount Oil Co.

Address Drawer 'Z' Jal., New Mexico

AREA 640 ACRES

LOCATE WELL CORRECTLY

We propose to drill well with drilling equipment as follows:

Rotary Tools O to TD

The status of a bond for this well in conformance with Rule 39 of the General Rules and Regulations of the Commission is as follows: Blanket Bond

We propose to use the following strings of casing and to land or cement them as indicated:

Size of Hole	Size of Casing	Weight Per Foot	New or Second Hand	Depth	Landed or Cemented	Sacks Cement
10-3/4	8-5/8	24#	New	300	Cemented	200
7-7/8	5-1/2	15.5#	New	3100	2-stage tools at approx. 1200'	400

If changes in the above plan become advisable we will notify you before cementing or landing casing. We estimate that the first productive oil or gas sand should occur at a depth of about 3100 feet.

Additional information:

Approved SEP 6 - 1951, 19
except as follows:

Sincerely yours,

Olsen Blount Oil Co.

Company or Operator

OIL CONSERVATION COMMISSION,

By Roy GushroughTitle Oil & Gas Inspector

The first part of the paper is devoted to a discussion of the general principles of the theory of the structure of the atom. It is shown that the structure of the atom is determined by the laws of quantum mechanics, which are based on the principle of the uncertainty of the position and momentum of the particles. The second part of the paper is devoted to a discussion of the structure of the nucleus. It is shown that the structure of the nucleus is determined by the laws of quantum mechanics, which are based on the principle of the uncertainty of the position and momentum of the particles.

The third part of the paper is devoted to a discussion of the structure of the molecule. It is shown that the structure of the molecule is determined by the laws of quantum mechanics, which are based on the principle of the uncertainty of the position and momentum of the particles. The fourth part of the paper is devoted to a discussion of the structure of the crystal. It is shown that the structure of the crystal is determined by the laws of quantum mechanics, which are based on the principle of the uncertainty of the position and momentum of the particles. The fifth part of the paper is devoted to a discussion of the structure of the liquid. It is shown that the structure of the liquid is determined by the laws of quantum mechanics, which are based on the principle of the uncertainty of the position and momentum of the particles.

The sixth part of the paper is devoted to a discussion of the structure of the gas. It is shown that the structure of the gas is determined by the laws of quantum mechanics, which are based on the principle of the uncertainty of the position and momentum of the particles. The seventh part of the paper is devoted to a discussion of the structure of the plasma. It is shown that the structure of the plasma is determined by the laws of quantum mechanics, which are based on the principle of the uncertainty of the position and momentum of the particles. The eighth part of the paper is devoted to a discussion of the structure of the solid. It is shown that the structure of the solid is determined by the laws of quantum mechanics, which are based on the principle of the uncertainty of the position and momentum of the particles. The ninth part of the paper is devoted to a discussion of the structure of the liquid crystal. It is shown that the structure of the liquid crystal is determined by the laws of quantum mechanics, which are based on the principle of the uncertainty of the position and momentum of the particles.

The tenth part of the paper is devoted to a discussion of the structure of the polymer. It is shown that the structure of the polymer is determined by the laws of quantum mechanics, which are based on the principle of the uncertainty of the position and momentum of the particles. The eleventh part of the paper is devoted to a discussion of the structure of the composite material. It is shown that the structure of the composite material is determined by the laws of quantum mechanics, which are based on the principle of the uncertainty of the position and momentum of the particles. The twelfth part of the paper is devoted to a discussion of the structure of the nanomaterial. It is shown that the structure of the nanomaterial is determined by the laws of quantum mechanics, which are based on the principle of the uncertainty of the position and momentum of the particles.

The thirteenth part of the paper is devoted to a discussion of the structure of the quantum material. It is shown that the structure of the quantum material is determined by the laws of quantum mechanics, which are based on the principle of the uncertainty of the position and momentum of the particles. The fourteenth part of the paper is devoted to a discussion of the structure of the superconductor. It is shown that the structure of the superconductor is determined by the laws of quantum mechanics, which are based on the principle of the uncertainty of the position and momentum of the particles. The fifteenth part of the paper is devoted to a discussion of the structure of the semiconductor. It is shown that the structure of the semiconductor is determined by the laws of quantum mechanics, which are based on the principle of the uncertainty of the position and momentum of the particles.
