August 21, 1961

Well No. 7 is located 660 ft. from S line and 1880 ft. from W line of sec. 33
SW/4 33 25-S 37-E Langlie-Mattix
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian) (Field)
Lea New Mexico
(County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is _____ ft. 2,978.70' G.L.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

It is proposed to drill with Rotary Tools to the Seven Rivers-Queen formation at about 3,500'. Set 8 5/8" casing at 300' with cement circulated. If productive set 5 1/2" casing to total depth and cement with about 250 sacks which gives a calculated fill-up of 1,691'.

This form is to amend location. This location was staked 660 feet from South line and 1880 feet from West line. Because of surface obstructions, the surveyor staked two alternate locations. Application was incorrectly made on the 660 feet from South line and 2060 feet from West line alternate location.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
