If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

We propose to install pumping unit and test tank at well location. We will pump test well to determine if well is economical to produce. Any oil produced will be transferred to oil tanks located in Unit 0 Section 33, T-25-S, R-37-E on same lease and sold. Oil will be co-mingled with oil produced from R. O. Gregory No. 3 located 330 FSL and 660 FWL Section 33, T-25-S, R-37-E on same lease. Any gas produced will be vented during test period. Any water produced will be disposed of into Rice Engineering Justis Salt Water Disposal System as approved by letter dated June 27, 1977.

18. I hereby certify that the foregoing is true and correct
