Midland, Texas

Your State #1 was reported ready for inspection and final approval of the plugging, but an inspection of the well by Mr. M. L. Armstrong reveals that the cellar has not been properly levelled, the "dead man hooks" have not been cut off, and cans and timbers are still scattered over the location. In order that your plugging report may be approved and the file closed on this location, you are requested to give this matter your immediate attention and notify us by letter when the well site is ready for final inspection.
