17. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work) SEE RULE 1103.

In an attempt to acidize and treat for scale, equipment trouble developed and the tubing is stuck in the hole. It was shut down on June 28, 1972. The upper zone is being operated as the Texaco, Inc. Stephens Estate Well No. 1 and is presently shut down. We propose leaving the well shut down until arrangements can be made to produce it as a single Dollarhide Tubb-Drinkard Well as problems have been experienced with producing available fluid volumes from the Tubb-Drinkard while pumping under packer.

18. I hereby certify that the information above is true and complete to the best of my knowledge and belief.
