Dear Mr. Seay:

Regarding Sirgo-Collier, Inc.'s Sundry Notice of intent to re-enter WDQSU #13, a temporarily abandoned injection well, you requested confirmation of cement top on 7" casing. I have pulled from the files a copy of the daily drilling report which lists, under the heading "Remarks", the cement top by temperature survey as 1010'. I hope this is satisfactory.

Sincerely,

Amy L. Whitley
