Well No. 46 is located 2130 ft. from N line and 1650 ft. from E line of sec. 32
24S 3E M.T.M.
 (1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)
Dollarhide Drinkard Lea New Mexico
 (Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

We propose to drill this test to a depth of 6850' drilling a 17" hole to approximate depth of 200' and cementing 13 3/8" 48# casing at that depth with sufficient cement to circulate cement into cellar. We will cement 9 5/8" 36# casing at a depth of approximately 3100' isolating the salt section and circulating to the surface on the second stage. We will cement 7" 20# and 3 1/2" at a depth of approximately 6450' with 300 sacks. We will allow 24 hour set time on surface, 36 hour on 9 5/8 and 48 hours on pay string. All cement jobs will be pressure tested according to regulations.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
