(INDICATE ABOVE BY CHECK MARK NATURE OF REPORT, NOTICE, OR OTHER DATA)

Well No. 1 is located 200 ft. from N line and 200 ft. from W line of sec. 31
14 (1/4 Sec. and Sec. No.) 4 (Twp.) 18 (Range) 1 (Meridian)
California (Field) San Diego (County or Subdivision) California (State or Territory)

The elevation of the derrick floor above sea level is _____ ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

We propose to set and cement approximately 300' of 5" casing in 11" hole with sufficient amount of cement to get return back to the surface.
 We will set and cement approximately 160' feet of 5" casing in a 6-7/8" hole with an estimated amount of cement sufficient to get return to a depth of about 100' on surface casing.

We will allow a cement time of 24 hours on the surface casing. At 72 hours on the top string. All casing and cement jobs will be tested in conformity with Federal regulations.

Estimated total depth of hole is approximately 700 feet.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
