Midland, Tex.

Gentlemen:

A check of the file for your North-Shore Woolworth No. 3 and Montecito Woolworth No. 2 in Section 33, T-24-S, R-37-E indicates that, although you were notified by form letter on July 6, 1956 that these wells were being placed in the Jalmat gas pool and that it would be necessary for you to obtain NSP Orders for them, you have not as yet made application to our Santa Fe office for these non-standard units.

We wish to advise you that these wells will remain on the Oil Proration Schedule only for the month of December and if NSP Orders have not been obtained by January 1, 1957, the allowables will be cancelled without further notice.

We are enclosing a memorandum for the filing of applications for non-standard units for your convenience.

Yours very truly,

Oil Conservation Commission

R. F. Montgomery
Proration Manager
