Justis
Well No. 3 is located 330 ft. from S line and 990 ft. from E line of sec. 11
SE/4 SE/4 Sec. 11 25-S 37-E N.M.P.M.
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)
Justis Lea New Mexico
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is 3134 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

This well was a proposed 6200' Blinbry & Tubb/Drinkard test. An 3-3/4" hole had been drilled to 961' when drill pipe became stuck. Several days of fishing operations have failed to clean up hole. We now propose to plug and abandon this well by setting cement plugs from 180' to 155', 100' to 75' and in top of hole. The rig will then be skidded 25' north to drill the Justis #3-X as a replacement well.

This plan verbally approved by Mr. Brown on 11/22/63.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
