Mr. Ramey  
New Mexico Oil Conservation Commission  
Hobbs, New Mexico

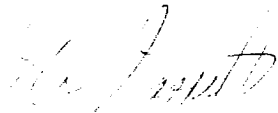

Dear Sir:

The annual packer leakage test run by Union Texas Petroleum Corporation on the Stuart No. 6 well in Sec. 11, 25S, 37E, North Justis Field, Lea County, New Mexico, indicated that communication exists between the Blinbry and Tubb-Drinkard zones.

We are preparing to workover the subject well to repair the communication that exists and will submit a packer leakage test on completion of the work.

Yours very truly,

UNION TEXAS PETROLEUM CORPORATION

  
G. W. Garrett  
Petroleum Engineer
