Well No. 22 is located 235 ft. from [N] line and 35 ft. from [E] line of sec. 22

11 (Sec. and Sec. No.) (Twp) (Range) (Meridian) New Mexico

(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is \_\_\_\_\_ ft.

## DETAILS OF WORK

(State the nature of the work, the location, and show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

This well was mudded on January 31, 1963 and was drilled to 354 feet with a cable tool rig and 7 inch 28 lb. 10 V ST&C casing was landed to said depth. Sixty sack of regular cement was circulated to the surface around said casing. The S.O.C. was 24 hours, at which time the well was bailed dry and after one hour the well was again tested with the bailer and it was still dry. The cable tool rig was moved out and now waiting on rotary rig for future drilling and completion.

I understand that this work is being performed in writing by the Geological Survey before operations may be commenced.
