DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

We propose to drill this well to a total depth of approximately 6200', set 9-5/8" OD casing at approx. 1000' and calculate a volume of cement to bring cement to surface, then drill 8-3/4" hole to TD., set 7" OD casing at T.D. and cement with a calculated volume to bring cement to bottom of 9-5/8" casing.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
